Redis-Exporter Installation

- Make sure docker is installed - Docker Installation
- Run redis-exporter docker container ,
  Supply:
  redis-password in this option `--redis.password=redis_password_here`
  Redis connection URL - `--redis.addr`

  ```
  sudo docker run -d --name redis-exporter -p 9121:9121 oliver006/redis_exporter --redis.
  addr=redis://<redis_vm_ip>:<redis_port> --redis.password=<redis_password_here>
  ```

- Full command should look like this
  ```
  sudo docker run -d --name redis-exporter -p 9121:9121 oliver006/redis_exporter --redis.addr=redis://10.
  0.0.175:6379 --redis.password=123
  ```
- Execute this command to auto restart the container if it stops
  ```
  sudo docker update --restart=always redis-exporter
  ```
